Our 1938 Introductions

WESTERN SUN

WESTERN SUN — Informal Decorative.

Huge blooms, ten to twelve inches across by five and one-half inches deep. Fine form, petals roll forward in a very pleasing manner. Color, clear golden orange, deeper at center. Stems erect at all times and hold the blooms well above the foliage. Free bloomer and has insect resisting foliage. Has won many prizes. This Dahlia was tested out in the Mid-West last year with splendid results. Roots -----**\$7.50**

CORAL LADY—Cactus. This was the most talked of Dahlia at the Western Washington Fair, in 1938, with the result that advance orders have practically exhausted our supply. Very fine incurving petals which curl and interlace over the center, blooms full, good depth and full centers. Color is a very lovely clear coral without shading. This Dahlia's only fault is that stems are wiry and not strong enough to hold its blooms erect. The public has demanded that this Dahlia be put on the market because of its unusual beauty. It won two first prizes and one second as the best undisseminated cactus at the shows in 1937. Stock limited. Roots, net -----**\$1.50**
